Re-Designing Youth Sport 2015-11-24 a provocative new approach to race in the workplace what role should racial difference play in the american workplace as a nation we rely on civil rights law to address this question and the monumental civil rights act of 1964 seemingly answered it race must not be a factor in workplace decisions in after civil rights john skrentny contends that after decades of mass immigration many employers democratic and republican political leaders and advocates have adopted a new strategy to manage race and work race is now relevant not only in negative cases of discrimination but in more positive ways as well in today's workplace employers routinely practice racial realism where they view race as real as a job qualification many believe employee racial differences and sometimes immigrant status correspond to unique abilities or evoke desirable reactions from clients or citizens they also see racial diversity as a way to increase workplace dynamism the problem is that when employers see race as useful for organizational effectiveness they are often in violation of civil rights law after civil rights examines this emerging strategy in a wide range of employment situations including the low skilled sector professional and white collar jobs and entertainment and media in this important book skrentny urges us to acknowledge the racial realism already occurring and lays out a series of reforms that if enacted would bring the law and lived experience more in line yet still remain respectful of the need to protect the civil rights of all workers
