from generation to generation people experience their landscapes differently humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased we presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths throughout human history people have also felt the need to monumentalize their sacred landscape but this is where the similarities end as different societies had very different understandings believes and practices the aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach more than 30 papers investigate diverse sacred landscapes from the iberian peninsula and britain in the west to china in the east they discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it we see the role of performance ritual orality textuality and memory in people s sacred landscapes a diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people s understandings a key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order sacred landscapes therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic

the epic tale of an ancient unsolved puzzle and how it relates to all scientific attempts to explain the basic structure of the universe at the dawn of science the ancient greek philosopher zeno formulated his paradox of motion and amazingly it is still on the cutting edge of all investigations into the fabric of reality zeno used logic to argue that motion is impossible and at the heart of his maddening puzzle is the nature of space and time is space time continuous or broken up like a string of beads over the past two millennia many of our greatest minds including aristotle galileo newton einstein stephen hawking and other current theoreticians have been gripped by the mystery this puzzle represents joseph mazur acclaimed author of euclid in the rainforest shows how historic breakthroughs in our understanding of motion shed light on zeno s paradox the orbits of the planets were explained the laws of motion were revealed the theory of relativity was discovered but the basic structure of time and space remained elusive in the tradition of fermat s enigma and zero the motion paradox is a lively history of this apparently simple puzzle whose solution if indeed it can be solved will reveal nothing less than the fundamental nature of reality
