## **Cur homo? A history of the thesis concerning man as a replacement for fallen angels**

2014-06-01

this monograph has set itself the goal to examine outline elucidate and supplement the existing body of knowledge concerning a theme from patristic and medieval theology recalled in 1953 by marie dominique chenu and that is the assertion that man was created as a replacement for fallen angels yves congar *créature de remplacement* louis bouyer *ange de remplacement* the study first shows that the idea of man having being created to take the place of fallen angels was introduced by st augustine and developed by other church fathers it then identifies the typical contexts in which the subject was raised by authors of the early middle ages but goes on to focus on the discussion that developed during the twelfth century anselm of canterbury the school of laon rupert of deutz honorius of autun which represents the high point of the theme under investigation culminating in the assertion that man is an original being created for its own sake for whom god created the world a world which together with and through man is destined for the heavenly jerusalem the question as to whether man would have been created if the angels had not sinned *cur homo* bears a clear similarity to a further controversy the origins of which also go back to the twelfth century and that is whether the son of god would have become incarnate if man had not sinned *cur deus homo* next the book sheds light on how the subject begins to gradually fade away through the twelfth and thirteenth centuries both within monastic tradition which nonetheless held onto augustine's motif and within scholastic theology which asserted that man was created for his own sake the conclusion summarizes the findings and points to the surprisingly contemporary relevance of the foregoing reflections particularly in relation to the critique that the swiss philosopher and theologian romano amerio 1997 offers concerning a statement in the pastoral constitution of the second vatican council *gaudium et spes* 24 according to which man is the only creature on earth that god willed for itself

## **Grazing Ecology and Forest History**

2000-01-01

it is a widely held belief that a climax vegetation of closed forest systems covered the lowlands of central and western europe before man intervened in prehistoric times to develop agriculture if this intervention had not taken place the forest would still be there and if left the grassland vegetation and fields now present would revert to a natural closed forest state although with a reduced number of wild species this book which an updated and expanded version of the author s 1997 thesis presented to the wageningen university netherlands challenges the traditional view using examples from history pollen analyses and studies on the ecology of tree and shrub species such as oak and hazel it tests the hypothesis that the climax vegetation is a closed canopy forest against the alternative hypothesis that species composition and vegetational succession were governed by large herbivores and that the central and western european lowlands were covered by a park like landscape consisting of grasslands scrub solitary trees and groves bordered by a mantle and fringe vegetation comparative information from the eastern usa is also included throughout the book this was not present in the thesis because the forests there are commonly regarded as being analogous to the primeval vegetation in europe the book is arranged in 7 chapters 1 general introduction and formulation of the problem 2 succession the climax forest and the role of large herbivores 3 palynology the forest as climax in prehistoric times and the effects of humans 4 the use of the wilderness from the middle ages up to 1900 5 spontaneous succession in forest reserves in the lowlands of western and central europe including examples from france germany austria slovenia sweden poland 6 establishment of trees and shrubs in relation to light and grazing and 7 final synthesis and conclusions twelve appendices are included giving further information and there are 67 pages of references and a subject index

## ***A Source Book for Mediaeval History : Selected Documents illustrating the History of Europe in the Middle Age***

1968

a source book for mediaeval history selected documents illustrating the history of europe in the middle age it will be observed that we have made use chiefly of documents quoting from chronicles only when it seemed absolutely necessary an exception to this general principle is found in section i where a larger use of chronicles was rendered necessary by the lack of documentary sources for much of the period covered but it is perhaps unnecessary to apologize for presenting selections from the important histories of tacitus gregory einhard and widukind in the matter of form translation omissions arrangements notes etc we were guided by considerations of the purpose of the book the style of most of the documents in the original is involved obscure bombastic and repetitious a faithful rendition into english would often be quite unintelligible we have endeavored to make a clear and readable translation but always to give the correct meaning if we have failed in the latter it is not for want of constant effort we have not hesitated to omit phrases and clauses often of a parenthetical nature the presence of which in the translation would only render the passage obscure and obstruct the thought as a rule we have given the full text of the body of the document but we have generally omitted the first and last paragraphs the former containing usually titles and pious generalities and the latter being composed of lists of witnesses etc we have given a sufficient number of the documents in full to illustrate these features of mediæval diplomatics all but the most trivial omissions in the text which are matters rather of form of translation are indicated thus insertions in the text to explain the meaning of phrases are inclosed in brackets quotations from the bible are regularly given in the words of the authorized version but where the latin taken from the vulgate

differs in any essential manner we have sometimes translated the passage literally within each section the documents are arranged in chronological order except in a few cases where the topical arrangement seemed necessary we believe that the explanatory notes in the form of introductions and foot notes will be found of service they are by no means exhaustive but are intended to explain the setting and importance of the document and the difficult or obscure passages it may contain the reference to the work or the collection in which the original is found is given after the title of practically every document the meaning of the references will be plain from the accompanying bibliography the original of nearly all the documents is in latin some few are in greek old french or german and in such cases the language of the original is indicated it is impossible of course to give explicit directions as to the use of the book other than the very obvious methods of requiring the student to read and analyze the documents assigned in connection with the lesson in the text book and of making clear to him the relation of the document to the event it may be possible also for the teacher to give the student some notion of the meaning of historical method e g the necessity of making allowance for the ignorance or the bias of the author in chronicles or the way in which a knowledge of institutions is deduced from incidental references in documents suggestions of both sorts will be found in the introduction and notes the teacher should insist on the use of such helps as are found in the book notes cross references glossary etc groups of documents can be used to advantage in topical work assigned topics worked up from authorities can be illustrated by documents selected from the book e g imperial elections papal elections the normans in sicily history of the austrian dominions germans and slavs on the eastern frontier relations of the emperors and the popes before the investiture strife etc
