United States Naval Aviation, 1910-1980 1981 from the research labs at the university to remote lakes in alberta and the northwest territories echoes in the halls tells us the stories about the antics the hijinks and the adventures of professors at the university of alberta a must read for history buffs and university alumni with so many wonderful memories of people events and achievements over the years it s no wonder that the university of alberta drama department holds such a large place in my heart and it s no wonder that i still come back for opening night frank bueckert no matter what the setting however i always found it immensely satisfying to teach undergraduates it was fun it was hard work and there was always something further to come ralph nursall

United States Naval Aviation, 1910-60 1960 why do international organizations ios look so different yet so similar the possibilities are diverse some international organizations have just a few member states while others span the globe some are targeted at a specific problem while others have policy portfolios as broad as national states some are run almost entirely by their member states while others have independent courts secretariats and parliaments variation among international organizations appears

as wide as that among states this book explains the design and development of international organization in the postwar period it theorizes that the basic set up of an io responds to two forces the functional impetus to tackle problems that spill beyond national borders and a desire for self rule that can dampen cooperation where transnational community is thin the book reveals both the causal power of functionalist pressures and the extent to which nationalism constrains the willingness of member states to engage in incomplete contracting the implications of postfunctionalist theory for an io s membership policy portfolio contractual specificity and authoritative competences are tested using annual data for 76 ios for 1950 2010 transformations in governance is a major academic book series from oxford university press it is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks it brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance the series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars the series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims authors use qualitative quantitative formal modeling or mixed methods a trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style the series is edited by liesbet hooghe and gary marks of the university of north carolina chapel hill and the vu amsterdam and walter mattli of the university of oxford

The Silk Factory 2015-05-21 this book sets out a measure of authority for seventy six international organizations ios from 1950 or the time of their establishment to 2010 which can allow researchers to

test expectations about the character sources and consequences of international governance the international organizations considered are regional e.g. the eu andean community nafta cross regional e.g. commonwealth of nations the organization of islamic cooperation and global e.g. the un world bank wto firstly the book introduces carefully constructed estimates for the scope and depth of authority exercised by international governments the estimates are unique in their comparative scope their specificity and time span secondly it describes describe broad trends in io authority by comparing delegation and pooling over time across ios and across decision areas thirdly it presents the evidence gathered by the authors to estimate international authority by carefully discussing forty seven international organizations and showing how their bodies are composed what decisions each body makes and how they make decisions

Dairyman and Dairy Engineering 1935 stanley yelnat s family has a history of bad luck going back generations so he is not too surprised when a miscarriage of justice sends him to camp green lake juvenile detention centre nor is he very surprised when he is told that his daily labour at the camp is to dig a hole five foot wide by five foot deep and report anything that he finds in that hole the warden claims that it is character building but this is a lie and stanley must dig up the truth in this wonderfully inventive compelling novel that is both serious and funny louis sachar has created a masterpiece that will leave all readers amazed and delighted by the author s narrative flair and brilliantly handled plot

Beyond Sovietology 1993 redd must be transformational redd requires broad institutional and governance reforms such as tenure decentralisation and corruption control these reforms will enable departures from business as usual and involve communities and forest users in making and implementing policies that affect them policies must go beyond forestry redd strategies must include policies outside the forestry sector narrowly defined such as agriculture and energy and better coordinate across sectors to deal with non forest drivers of deforestation and degradation performance based payments are key yet limited payments based on performance directly incentivise and compensate forest owners and users but schemes such as payments for environmental services pes depend on conditions such as secure tenure solid carbon data and transparent governance that are often lacking and take time to change this constraint reinforces the need for broad institutional and policy reforms we must learn from the past many approaches to redd now being considered are similar to previous efforts to conserve and better manage forests often with limited success taking on board lessons learned from past experience will improve the prospects of redd effectiveness national circumstances and uncertainty must be factored in different country contexts will create a variety of

redd models with different institutional and policy mixes uncertainties about the shape of the future global redd system national readiness and political consensus require flexibility and a phased approach to redd implementation
