this book complements the more textually based bauhaus scholarship with a practice oriented and creative interpretive method which makes it possible to consider bauhaus related works in an unconventional light edit toth argues that focusing on the functionalist approach of the bauhaus has hindered scholars from properly understanding its design work with a global scope and under studied topics the book advances current scholarly discussions concerning the relationship between image technologies and the body by calling attention to the materiality of image production and strategies of re channeling image culture into material processes and physical body space the space of dimensionality and everyday activity

in 2003 tel aviv became a unesco world heritage site on this occasion tel aviv was described as a synthetic representation of some of the most significant trends of the modern movement in architecture as it developed in europe today the white city in tel aviv with its some 4 000 buildings from the 1920s and 1930s is renowned as the largest collection of so called bauhaus buildings in the world what does it mean that the architects of these projects arrived from all over europe and only six of them were bauhaus alumni over recent decades the word bauhaus has become synonymous with modernity in art design and architecture often disregarding the original intentions of the school founded in 1919 and closed in 1933 it serves as a label for all kinds of merchandise among them architecture is the most prominent but what is bauhaus and is there such a thing as a specific bauhaus architecture in search of an answer to these crucial questions students from germany israel and austria studied the original bauhaus buildings in dessau germany before traveling to tel aviv israel to undertake further research for them the question remained bauhaus or not klappentext

after the bauhaus s closing in 1933 many of its protagonists movd to the united states where their acceptance had to be cultivated in this book margret kentgens craig shows that the fame of the bauhaus in america was the result not only of the inherent qualities of its concepts and products but also of a unique congruence of cultural supply and demand of a consistent flow of information and of fine tuned marketing thus the history of the american reception of the bauhaus in the 1920s and 1930s foreshadows the paterns of fame making that became typical of the post world war ii art world book jacket

foragacs examines the development of the bauhaus school of architecture and applied design by focusing on the idea of the bauhaus rather than on its artefacts what gave this idea its extraordinary powers of survival founded in 1919 with the architect walter gropius as its first director the bauhaus carried within it the seeds of conflict

from the start the duration of the bauhaus coincides very nearly with that of the weimar republic the bauhaus idea the notion that the artist should be involved in the technological innovations of mechanization and mass production is a concept that was bound to arouse the most passionate feelings it is these two strands personal and political that forgacs so cleverly interweaves the text has been extensively revised since its original publication in hungarian and an entirely new chapter has been added on the bauhaus s russian analogue vkhutemas the moscow academy of industrial art

the history of modern design and architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture these attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art mostly associated with but certainly not limited to richard wagner's theoretical writings and musical dramas this utopian dream of the gesamtkunstwerk or total work of art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories cities and even modern media as a result the experiments ranged from music poetry and drama to architecture design visual communication and city planning these ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today but their complex and often problematic roots are mostly ignored design and architecture have delivered some of the broadest and most influential experiments with the gesamtkunstwerk from garden cities for workers and corporate identity design to the german aeg corporation

an exploration of the bauhaus school and its legacy in the context of

the modernist period including its wider influence on art design and education bauhaus goes west is the story of cultural and artistic exchange between germany and the west over a period of seventy years it presents a view of the influential bauhaus school in relation to the wider modernist period distinguishing between the received idea of the bauhaus and the documented reality initially the bauhaus was seen as an educational experiment only later was it recognized as a style and a movement working from meticulous research alan powers reexamines speculations about the reception and understanding of individuals connected with the bauhaus school and what they ultimately achieved looking in greater detail at the theory and practice of art design and architecture between the arts and crafts movement and modernism this book challenges the assumption that the 1920s represented a void of reactionary conservatism bauhaus goes west offers an opportunity to recover some of the overlooked aspects of avant garde that ran parallel with the work of the bauhaus such as the film making of francis brugui re and len lye and the development of art instruction for children under marion richardson and the london county council

the bauhaus is to this day still regarded as the nucleus of the early 20th century german avant garde and no artist practiced its principles more enthusiastically in the united states than austrian born herbert bayer 1900 1985 conceived as an artist utopia the bauhaus developed from a blend of profound depression resulting from the lost war with its breakdown of intellectual and economic life and the ardent hope

and desire to build up something new from these ruins the history of the weimer republic founded in 1919 as the first german democracy and the creation of the bauhaus in the same year were both subject to the slow political decline that carried them to their grave in berlin in 1933 though it was in existence for only 14 years the ideology carried forth from the bauhaus would have a profound impact both in europe and the united states for more than six decades bauhaus ideals stood at the core of herbert bayer s artistic approach in the belief that art technology and nature should have a unity along with his contemporaries walter gropius marcel breuer and laszlo moholy nagy bayer believed in the importance of the total artist moving between private autonomous expression and public projects which made them unique in their creative depth and scope

resurrecting the work of gifted craftswomen too long denied their place as pioneers in their field women s work textile art from the bauhaus unearths a missing chapter in the story of the most important institution in the history of modern design the bauhaus defined modern design in the twentieth century as the preeminent design phenomenon of the era almost every aspect of it has been minutely examined yet the weaving workshop the longest standing and most successful of all bauhaus workshops has been neglected for one simple reason when the first wave of brilliantly talented women arrived at the school they soon discovered that bauhaus founder walter gropius could not sustain his ringing declaration of equality between the beautiful and the strong gender textiles in the hierarchy of art and design were to be women s work their results however were remarkable both in the early days of artistic expression in weimar and in later developments in the textile industry the craftswomen responded to the demands of advanced

technology with fabrics that incorporated new or unusual materials such as cellophane leather and early synthetics which had acoustic and light reflecting properties they produced multi layered fabrics cloths with double and triple weaves and later made extensive use of the jacquard loom the result was a rebirth of hand weaving and new professionalism in designing textiles for mass production in this model study superlatively documented with rare or little seen photographs of the textiles and their makers sigrid wortmann weltge captures the heady atmosphere of creative excitement at the bauhaus original archival research and interviews both with survivors and their students and with leading contemporary designers detail the workshop s history and its enduring legacy when the nazis closed the institution in 1933 its members dispersed to switzerland holland england france russia mexico and throughout the united states their ideals and influence live on in marvelous fabrics still being produced today book jacket title summary field provided by blackwell north america inc all rights reserved

the bauhaus school in germany has long been understood through the writings of its founding director walter gropius and well known artists who taught there such as wassily kandinsky and lászló moholy nagy far less recognized are texts by women in the school's weaving workshop in bauhaus weaving theory t ai smith uncovers new significance in the work the bauhaus weavers did as writers from

colorful expressionist tapestries to the invention of soundproofing and light reflective fabric the workshop s innovative creations influenced a modernist theory of weaving in the first careful examination of the writings of bauhaus weavers including anni albers gunta stözl and otti berger smith details how these women challenged assumptions about the feminine nature of their craft as they harnessed the vocabulary of other disciplines like painting architecture and photography smith argues the weavers resisted modernist thinking about distinct media in parsing texts about tapestries and functional textiles the vital role these women played in debates about medium in the twentieth century and a nuanced history of the bauhaus comes to light bauhaus weaving theory deftly reframes the bauhaus weaving workshop as central to theoretical inquiry at the school putting questions of how value and legitimacy are established in the art world into dialogue with the limits of modernism smith confronts the belief that the crafts are manual and technical but never intellectual arts
