Dressage in the Fourth Dimension 2010-09-07 dressage is often seen as the most formal and controlled of the equine sports following an ancient standardized training progression for philosopher and dressage instructor dr sherry ackerman dressage is much more it along with riding in general can be a transformational art and an avenue for reflection exploration and self knowledge through which a rider can experience liberation from the individual egoistic self this second revised edition of dressage in the fourth dimension is a pioneer work in awakening dressage consciousness drawing on such diverse sources as sacred geometry ancient western and eastern philosophies and esoteric spirituality ackerman seeks to heal humanity s alienation from nature through riding she points us toward the liberation from societal conditioning and normative thinking and ultimately from our own egos her concept of the fourth dimension requires us to leave the analytic objective mind behind and enter into the mystery of inspiration a short unique thought provoking work that has enjoyed a word of mouth reputation among horse people for years dressage in the fourth dimension will challenge riders assumptions about their

horses and themselves

The Horses Who Made Me 2023-10-31 the new york times calls joe camp a master storyteller when he gets passionate about something it always winds up being woven into an engaging story so you will devour every essence and read it over and over again he believes that horses love the opportunity to grow with you and have fun with you to learn new things and be rewarded in a positive way that they truly enjoy joe s words i believe if you say to your horse do something i like and i ll do something you like you will find that he will become the most willing of partners i also believe that thorses love being able to speak to you to initiate conversation like cash does when he walks up and offers his big toothy smile saying might i have a treat please many trainers dislike the use of treats for training some even say we shouldn t talk to our horses training should all be based upon body language just as the horses use with each other in the herd we believe that the horse s language is important because once the horse understands that you know his language once you have given him the choice of trusting you of being in relationship with you and once you have proven your leadership to the horse then he has a clear capability to grow and understand our language to learn things he might not have ever had the chance to learn if he had remained in a herd somewhere sort of like you grew when you went off to school teaching your horse that you understand his herd language is a must in the beginning but we now know that communication increases exponentially both in comprehension and speed of learning when treats are strategically used i suppose it comes from so many years working with benji before horses and finally drawing the conclusion that whatever a dog can learn a horse can learn as well because with treats they both want to learn and the horse will be just as happy about showing off as benji is believe it or not now all backed up by a new scientific study come with us as we step outside the box and discover how to give our horses a new and exciting way to learn and communicate with us and have fun whoa hold on there have we stumbled onto something that actually teaches the horse and the horse enjoys it thinks it s fun yes we did and with this book we share it all with you with free kindle apps download this book to your computer iphone android blackberry ipad kindle or all of the above for one teeny little price of 2 99 the stories you love and the information you need will always be with you what readers and critics are saying about joe camp joe camp is a gifted storyteller and the results are magical joe entertains educates and empowers baring his own soul while articulating keystone principles of a modern revolution in horsemanship rick lamb author and tv radio host the horse show one cannot help but be touched by camp s love and sympathy for animals and by his eloquence on the subject michae korda the washington post joe camp is a natural when it comes to understanding how animals tick and a genius at telling us their story his books are must reads for those who love animals of any species monty roberts author of new york times best seller the man who listens to horses the tightly written simply designed and powerfully drawn chapters often read like short stories that flow from the heart camp has become something of a master at
