## ***Tools and Techniques of Leadership and Management***

**2012-06-25**

many of today's books on the tools and techniques of leadership and management provide descriptions of long lists for use in decision making leading coaching and project management this book takes a completely different approach it contests the claims that the tools and techniques are based on evidence and explains why human activities of leading and managing are simply not amenable to scientific proof and consequently why long term futures of organizations are unpredictable the book undertakes a critical exploration of just what these tools and techniques are about showing that while they may lead to competent performance they cannot go further to expert performance because expertise involves going beyond rules and procedures ralph stacey investigates the many questions that are thrown up as a result of this new approach questions such as how do we apply this new way of thinking what are the practical tools and techniques it gives us what is the role of leaders in an unpredictable world how does complexity affect the way organizations are structured and function this book will be relevant to students on courses and modules that deal with leadership decision making and organizational development and behaviour as well as professional leaders and managers who want to develop their own understanding and techniques

the industrial revolution provided many tools that have made our current way of life possible. With over 100 years of success, they became the assumed natural, correct ways to make change happen for all of the benefits those tools offer. They are no longer sufficient to address today's complex systems and organizations. There are too many variables, too many changes happening too quickly, too much change to believe every issue can be deconstructed, decomposed, analyzed, prioritized, and the one best guaranteed way implemented to address all of that complexity. We believe an additional set of concepts and tools is required to make sense of this complexity. We've named them the complexity space framework and believe it offers a new lens for teams and organizations looking to survive and prosper in a complex world.

this book is a commendable source of reference for entrepreneurship researchers. It offers insight into a number of focused research accounts that may assist other researchers in their entrepreneurship research proposals and execution. The literature review section will be of particular value to such early scholars of the field. The book is highly recommended for postgraduate entrepreneurship students and would be worthy of filling a space on any active entrepreneurship researcher's bookshelf. David Douglas, *International Journal of Entrepreneurial Behaviour and Research*. Strategic choices made by entrepreneurs have major consequences for SME performance. This book explores the factors that influence entrepreneurial strategic decisions using a cognitive theoretical framework. The proposed model based on a dual processing approach integrates motivation, emotions, and information processing modes and is tested in several empirical studies. The results show the model's potential for furthering interesting research agendas in entrepreneurial cognition research. The authors also reveal that entrepreneurial cognitions can be elicited and represented in the form of cognitive maps. The structural complexity of the cognitive maps. Cognitive complexity is an important prerequisite of effective strategic decisions and is a core concept for the advancement of our knowledge in entrepreneurial cognition. The book is an informed and interesting exploration of entrepreneurial cognition with both theoretical and methodological contributions to this field of research. Entrepreneurial strategic decision making will be of great interest to undergraduate students and academics in the field of entrepreneurship. Policymakers will learn from this book to understand the distinctions between various types of entrepreneurial decision makers and the way they make strategic decisions.
