mayan daykeeper hunbatz men reveals the multi calendar system of the maya that guided the lives of his ancestors and how it can guide us today the first book to reveal the secrets of the mayan pleiades calendar the tzeq eb explains how the maya used their astronomical knowledge to guide their lives on earth the mayan calendar has taken on special prominence with the imminent arrival of 2012 a date that many claim is the end of that calendar however as mayan elder and daykeeper hunbatz men shows the cosmological understanding of his ancestors was so sophisticated that they had not one but many calendars each based on the cycles of different systems in the cosmos in this book he reveals for the first time the tzeq eb or pleiades calendar of 26 000 years which charts the revolution of our solar system around alcyone the central star of the pleiades system he also discusses the k uuk ulcan calendar of the 4 seasons of the solar year and the wheel of the k altunes calendar which is composed of 13 cycles of 20 years each that form a calendar of 260 years in traditional mayan culture the computation of time was not determined by simple economic or social motives the calendars served the higher purpose of synchronizing the lives of human beings and their societies to the great cosmic pulsation to the rhythm of the annual seasons and to the other cycles that dictate changes upon earth mayan understanding of the cosmic cycles was so exact that this knowledge could be used to influence all stages of life from planning when to conceive parents could choose not only the sex of their child but its vocation and future destiny to plotting out the course of the entire society pyramids played a crucial role in applying this wisdom because as hunbatz men shows they were able to produce and transform energy in accordance with the cosmic cycles charted by the calendars this book reveals for the first time the wisdom of the multi calendar mayan system and how it can help guide our modern world

includes pictures describes the history and archaeology at each site includes a bibliography for further reading many ancient civilizations have influenced and inspired people in the 21st century like the greeks and the romans but of all the world s civilizations none have intrigued people more than the mayans whose culture astronomy language and mysterious disappearance all continue to captivate people at the heart of the fascination is the most visited and the most spectacular of late classic maya cities chich n itz chich n itz was inhabited for hundreds of years and was a very influential center in the later years of maya civilization at its height chich n itz may have had over 30 000 inhabitants and with a spectacular pyramid enormous ball court observatory and several temples the builders of this city exceeded even those at uxm al in developing the use of columns and exterior relief decoration of particular interest at chich n itz is the sacred cenote a sinkhole was a focus for maya rituals around water because adequate supplies of water which rarely collected on the surface of the limestone based yucatan were essential for adequate agricultural production the maya here considered it of primary importance underwater

archaeology carried out in the cenote at Chichén Itz revealed that offerings to the Maya rain deity Chaac which may have included people were tossed into the sinkhole. Early Mayapán was closely connected to the overshadowing power of the region at the time the mighty trading city of Chichén Itz emerged first as a minor settlement in the orbit of Chichén but it slowly came to replace it after the larger city's trade connections with the Toltecs of Tula crumbled and it suffered a staggering defeat by Mayapán's armies. The building styles and art in their city show both admiring references to the great Chichén Itz as well as an attempt to position Mayapán as a more orthodox heir of Maya tradition. At the same time they emulated many features and could not escape the tremendous influences especially in religion of Chichén. This is seen in the fact that many of the most important buildings in the new city appear to be small scale reproductions of ones in Chichén. The Maya maintained power in the Yucatán for over a thousand years and at the height of its classical era 3rd-9th centuries CE the city of Tikal was one of the power centers of the empire. Archaeologists believe Tikal had been built as early as the 5th or 4th century BC and eventually it became a political, economic and military capital that was an important part of a far flung network across Mesoamerica. Despite the fact it was seemingly conquered by Teotihuacán in the 4th century CE it seems the foreign rulers came to assimilate Mayan culture thus ensuring Tikal would continue to be a power base and as a result the city would not be abandoned until about the 10th century CE. During the Maya's classical era the city of Uxmal was one of its most noteworthy places while it was not as powerful as cities like Tikal. Uxmal was apparently at the forefront of Mayan culture particularly when it came to architecture. However while Uxmal used high ground to display its prominence and the ruins are still among the most popular places for tourists in the region the site is still shrouded in mystery even as scholars continue to work on the site to further interpret it. It's still unclear when exactly Uxmal was founded, how many people called it home and when it was abandoned. Despite the existence of Mayan chronicles and oral legends what is apparent however is the skills of Uxmal's artisans whether through constructing structures like the five level pyramid of Magicians and the expansive Governor's Palace or adorning the structures with precisely detailed art and sculptures. In fact the craftsmanship can be credited with helping to preserve Uxmal itself.

The world's foremost expert on Maya culture looks at 2012 hysteria and explains the truth about what the Maya meant and what we want to believe. *Apocalypse 2012: An Investigation into Civilizations' End, the World Cataclysm in 2012*. 2012: The Return of Quetzalcoatl. According to many of these alarmingly titled books the ancient Maya not only had a keen insight into the mystical workings of our planet and the cosmos but they were also able to predict that the world will end in the year 2012. David Stuart, the foremost scholar of the Maya and recipient of numerous awards for his work, takes a hard look at the frenzy over 2012 and offers a fascinating and accurate trip through Mayan culture and belief. Stuart shows how the idea that the end of the Mayan calendar which supposedly heralds the end of our own existence says far more about our culture than about the ancient Maya. The *Order of Days* explores how the real intellectual achievement of ancient Maya timekeeping and worldview is far more impressive and remarkable than any of the popular and often outrageous claims about this advanced civilization as someone who has studied the Maya for nearly all of his life and who specializes in reading their ancient texts, Stuart sees the 2012 hubbub as the most recent in a long chain of related ideas about Mesoamericans, the Maya in particular, that depicts them as somehow oddball, not of this world or as having some strong mystical link to other realms. Because the year 2012 has no prominent role in anything the ancient Maya ever actually wrote, Stuart takes a wider look at the Maya concepts of time and their underlying philosophy as we can best understand them. The ancient Maya, Stuart contends, were worthy of study and admiration not because they were strange but because they were altogether human and they developed a compelling vision of time unlike any other civilization before or since.
