pakistan today stands at a critical juncture in its short history of existence while much has been written about pakistan little is known about communism or left leaning politics in the country post partition which played a key role in shaping pakistani politics today kamran asdar ali here presents the first extensive look at pakistan's communist and working class movement the author critically engages with the history of pakistan's early years while paying special attention to the rise and fall of the communist party of pakistan cpp from partition in 1947 to the aftermath of bangladeshi independence in 1971 since its formation in 1947 as a homeland for south asian muslims pakistan has been a configuration of shifting alliances and competing political and social ideologies pakistan has experienced three military takeovers and is plagued with geopolitical conflict from kashmir to baluchistan waziristan and while these aspects of pakistan make headlines in order to understand the complexities of these events it is vital to understand the state's relationship throughout history with its divergent political and ethnic voices one dominant feature of the state along with its emphasis on the islamic nature of its polity has been the non resolution of its ethnic problem while the history of pakistan is often viewed through the lens of unified muslim nationalism the author here also explores the history of pakistan's often tense relationship with its various ethnic groups baluch pathan sindhis punjabis and bengalis shedding light on a vital and little researched aspect of pakistani history this book shows that military coups islamic radicalization and terrorist activities do not constitute the sum total of pakistan's history that it too has had a history that included the activities of communist intellectuals and activists
