glovebox

The Steampunk User's Manual

2015-11-25

the book is based on results from the russian expedition in the region of the
antarctic peninsula and powell basin in the northern part of the weddell sea
as well as on the review of earlier research in the region the main goal of
the research was to collect the newest data and study the physical properties
and ecology of this key region of the southern ocean data analysis is
supplemented with numerical modeling of the atmosphere ocean interaction and
circulation in the adjacent region including research on rogue waves the
focus of the study was the antarctic circumpolar current currents and water
properties in the bransfield strait and antarctic sound properties of
seawater currents ecosystem and biological communities in the powell basin of
the northwestern weddell sea and their variations an attempt is made to
reveal the role of various components of the antarctic environment in the
formation of biological productivity and maintenance of the antarctic krill
population this is especially important as in the last decades the antarctic
environment has experienced significant changes related to the global
climatic trends
