Information Technology for Managers 2009-06-01 considerable change has transpired in the years since the first edition of this book was published yet the paradox remains investments in it enabled business change are still not being consistently translated into business value this is the information paradox the conflict between the widely held belief that information and investment in it to provide that information is a good thing and the all too frequent reality that we cannot demonstrate a connection between it investments and business results john thorp and fujitsu consulting have continued to work with many clients around the world implementing the benefits realization approach a unique client tested framework that introduces a benefits focused mindset their experience has led to the understanding that the issues with it value are merely a symptom of a broader business value

problem and to the development of a new expanded approach enterprise value management a completely new afterword outlines this new approach which goes beyond the challenge of it value to provide a comprehensive value driven organizational governance process it builds on the foundation of benefits realization to help organizations manage value in an increasingly uncertain and real time business environment it takes readers to a new level of understanding book jacket title summary field provided by blackwell north america inc all rights reserved
