jobs and spooled output consume system resources mainly the cpu used to create and manage them and the storage to contain them typically in most environments you can manage resources that jobs and spooled files consume successfully however on the largest systems with the largest numbers of jobs and very large numbers of spooled files you can encounter limits too many jobs can fill up the job table or too many spooled files can consume all the system s storage having a large number of jobs and spooled files in the system can contribute to potentially long ipls for unexpected outages having a very large number of spooled files on a single output queue can result in lock contention this ibm redpaper publication describes best practices and recommendations for managing jobs and spooled output on ibm i it provides an overview of the various controls within the ibm i operating system that you can configure to adjust the limits for spooled output and jobs it also provides recommendations for setting these values we do not explain in detail each of the configuration controls that we discuss in this paper rather if you need additional information regarding the topics that we discuss see the ibm i 6 1 information center at [publib.boulder.ibm.com/ieseries](http://publib.boulder.ibm.com/ieseries)

## **Best Practices for Managing IBM i Jobs and Output (and a few other special tips)**

2008-09-18

in 1993 the national research council released its landmark report understanding child abuse and neglect nrc 1993 that report identified child maltreatment as a devastating social problem in american society nearly 20 years later on january 30 31 2012 the institute of medicine iom and nrc s board on children youth and families help a workshop child maltreatment research policy and practice for the next generation to review the accomplishments of the past two decades of research related to child maltreatment and the remaining gaps there have been many exciting research discoveries since the 93 report but we also want people to be thinking about what is missing said anne petersen research professor at the center for human growth and development at the university of michigan and chair of the panel that produced the report child maltreatment research policy and practice for the next decade workshop summary covers the workshop that brought together many leading u s child maltreatment researchers for a day and a half of presentations and discussions presenters reviewed research accomplishments identified gaps that remain in knowledge and consider potential research priorities child maltreatment research policy and practice for the next decade workshop summary also covers participant suggestions for future research priorities policy actions and practices that would enhance understanding of child maltreatment and efforts to reduce and respond to it a background paper highlighting major research advances since the publication of the 1993 nrc report was prepared by an independent consultant to inform the workshop discussions this summary is an essential resource for any workshop attendees policy makers researchers educators healthcare providers parents and advocacy groups
